About Evelyn Partners

Evelyn Partners is an award-winning investment company that builds on a heritage of more than 180 years. Our clients include private individuals, families, charities and professionals, and we are trusted to manage over £59.1 billion¹ on their behalf.

At Evelyn Partners, our focus is to preserve and grow the real value of our client assets after inflation and fees.

Investment Approach

The Sustainable Managed Portfolio Service is a range of actively managed investment portfolios, designed to give investors direct access to the ideas generated by the Evelyn Partners investment process. With six different strategies, each portfolio is linked to our sophisticated risk profiling process to ensure investors have exposure to the optimal blend of available asset classes. Drawing on the expertise of our extensive internal research resource and overseen by a dedicated team of the firms most senior investment professionals, each is periodically re-balanced to meet a range of clearly articulated inflation plus return targets.

Our sustainable criteria, which seeks to avoid the traditional "sin" sectors and to invest in companies that demonstrate Environmental Social and Governance (ESG) and sustainability credentials, is determined by our Sustainable Portfolio Manager, Geneva Banzky von Ambroz.

Important Information

Past performance, or any yields quoted, should never be considered a reliable indicator of future returns. The value of investments and the income from them may go down as well as up. You may not get back the amount you invest.

When investments are made in overseas securities, movements in exchange rates may have an effect on the value of that investment. The effect may be favourable or unfavourable. Please note that bond funds may not behave like direct investments in the underlying bonds themselves. By investing in bond funds the certainty of a fixed income for a fixed period with a fixed return of capital are lost. Different funds carry varying levels of risk depending on the geographical region and industry sector in which they invest. You should make yourself aware of these specific risks prior to investing. Targeted absolute return funds do not guarantee a positive return and you could get back less than you invested, much like any other investment. Additionally, the underlying assets of targeted absolute return funds generally use complex hedging techniques through the use of derivative products. Funds which invest in specific sectors may carry more risk than those spread across a number of different sectors. In particular, gold, technology and other focused funds can suffer as the underlying stocks can be more volatile and less liquid. The property market can be illiquid; consequently, there can be times when investors will be unable to sell their holdings. Property valuations are subjective and a matter of judgement.
